FORWARD

Agriculture is Montana's leading industry. Cash receipts from farm marketings and government payments totaled $549.9 million in 1968. Montana farms and ranches provided employment for 61,000 persons, and related enterprises furnished employment for many more.

This Supplement to Montana Agricultural Statistics Volume XII has brought together 16 years of the final estimates by county for wheat and barley. It contains acreage, yield, and production of the 3 kinds of wheat and barley for 1952 through 1967. The county estimates presented in this supplement supersede previous releases. Researchers and all other users of historical county data will find this supplement an invaluable reference.

Complete and accurate basic information contributes to improved decision-making in any organization, whether farm unit, private business, corporation, or State government. The statistics in this bulletin provide the basic information about Montana's foremost crops.

The data in this publication were assembled with the cooperation of public-spirited Montana people who voluntarily provided information concerning their own operations. While most of the basic information was obtained from farmers and ranchers, supplemental information was acquired from mills and elevators, railroad companies, and others.

State agencies in addition to those in the Montana State Department of Agriculture which contributed significantly were the Railroad and Public Service Commission and the Board of Equalization. Agencies of the U. S. Government which furnished extensive record material were the Agricultural Statilization and Conservation Service, Soil Conservation Service, and Extension Service. Credit and thanks are due to these and all others who assisted the Statistical Reporting Service in making data available. Funds for the printing of this publication were furnished by the Montana State Department of Agriculture.

The text and statistical data presented in this bulletin were prepared by the staff of the Statistical Reporting Service, United States Department of Agriculture, under the direction of Frasier T. Galloway, Agricultural Statistician-in-Charge. Staff members who contributed significantly in the preparation of this issue were John E. Cochrane, Olav Rogness, L. Max Cain, E.N. (Swede) Severson, Robert G. Prongua, Agricultural Statisticians; Jerry G. Thorson and Charles R. Meyer, Statistician Student Trainees; Grace A. Cross, Statistical Assistant; and clerks Ellen M. Carkulis, Edith A. Coe, Donna R. Doggett, Rita Rae East, Jean M. Eickmeyer, Anita M. Engstrom, Charlotte A. Hagen, Roy D. Jones, Rose M. Miller, Ollie K Mires, Lois C. Rigler, and Eleanor A. Teigen.

Offices of the Statistical Reporting Service are located in Room 208, McGaffick Steamboat Block, 616 Helena Avenue, Helena, Montana. Estimates published by this agency are available to anyone without charge by writing to the Agricultural Statistician, Post Office Box 1726, Helena, Montana 59601.
